## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 27-34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Examiner cannot find support for the limitation regarding half wavelength Zo impedance waveguide in the specification.

### ***Allowable Subject Matter***

Claims 21-26, 35-38, 47 and 48 are allowed.

Claims 39-46 and 49-56 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of records does not disclose or fairly teach a first waveguide coupled between the first input port and the second input port; a second waveguide coupled between the first output port and the second output port; a third waveguide coupled between the first input port and the first output port; a fourth waveguide coupled between the second input port and the second output port; and a fifth waveguide coupled between central points of the third waveguide and the

fourth waveguide, where: at a center frequency of a pre-determined frequency band, each of the waveguides is a half wavelength waveguide with respect to the center frequency, the first, second, third, and fourth waveguides have a first impedance approximately given by  $\sqrt{2}Z_0$  and the fifth waveguide has a second impedance approximately given by  $Z_0/\sqrt{2}$ .

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
